DETAILED ACTION

1. Claims 8 and 9 are allowed in response to applicant's amendments filed on 8/28/2006.

STATEMENT OF REASONS FOR ALLOWANCE

2. The most pertinent prior art known to the Examiner is listed on the attached form PTO-892. As shown by the Yamazaki patent, it is known in the art to manufacture electrically conductive compositions and electronic components containing metal and metal oxide particles wherein the metal oxide particles have nanometer size ranges. However, the prior art does not teaches nor suggests the use of the metal oxides in the sizes ranges that are claimed. Even assuming arguendo that the claimed oxides in the claimed size ranges were prima facie obvious, the Specification in Table 2 shows the unexpected advantage preventing crack formation and subsequent delamination of the conductive layer from the ceramic substrates. This comparative data is sufficient to rebut any such hypothetical case of prima facie obviousness of the claimed combination of components. Accordingly, the claimed invention, as a whole, would not have been obvious to one of ordinary skill in the art.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jaison P. Thomas whose telephone number is (571) 272-8917. The examiner can normally be reached on Mon-Fri 8:30 am to 5:00 pm.
